CR Metallic

EFFORTLESS – RESISTANT – COLOURFUL

The easy way to create
metallic embroidery

Threads | Stabilisers | Accessories

Discover the metallic thread engineered for unrivalled ease of use

The **CR Metallic** range consists of high-quality threads that make everyday metallic embroidery easy and so accessible to everyone.

Specially constructed to run smoothly through both machine and needle, the **CR Metallic** threads enrich the designs with long-lasting and exquisite brilliance.

- **resistant up to 95° C / 203° F**
(some colours up to **60° C / 140° F**)
- **STANDARD 100** by OEKO-TEX®,
product class I (suitable for babies/toddlers)
- made in Germany
- **great choice of colours** and many silver and gold nuances
- all shades are **resistant to oxidation**
- excellent value for money

CR Metallic threads are available in two thicknesses. The indications of use for each of them are for orientation only. Given the particularities of every machine and project, tests should be run by the embroiderer to find the suitable settings.

CR 40

The universal metallic thread for everyday use

68% polyester, 32% metallised polyester

Art. No. 978

10 x 2.500 m

box with 10 cones / shade

dtex 230

den 210

75/11 (65/9)

42 colours

Stitch density:

approx. 0,35 - 0,4 mm

Indicative thread tension:

80 - 100 gf or cN

Whether you are a metallic thread professional or a beginner working with polyester threads and wanting to change from substitution colours to real metallic shades, **CR 40** is your daily companion for various applications on many materials.

CR 40 is an easy-to-use and versatile thread, suitable for many industries, from fashion to workwear, as well as for demanding materials like leather and denim.

CR 20 The voluminous metallised yarn for outstanding effects

80% textured polyester, 20% metallised polyester

Art. No. 975
10 x 2.000 m
box with 10 cones / shade

dtex 510
den 460

90/14
(San®8 FFG 80/12)

16 colours

Stitch density:
approx. 0,7 - 0,8 mm

Indicative thread tension:
200 - 225 gf or cN

It's your turn to shine! Use your skills to create bold effects with **CR 20 Metallic**.

If you are familiar with other thick threads such as Burmilana 12, there is nothing new to learn and you can easily start to use **CR 20** to highlight contours and various other elements in designs.

Just let it stand alone and shine, or combine it with other threads to create eye-catching contrasts. It is suitable for embroidery, as well as for decorative sewing on fashion articles, traditional clothing, home textiles and many more.

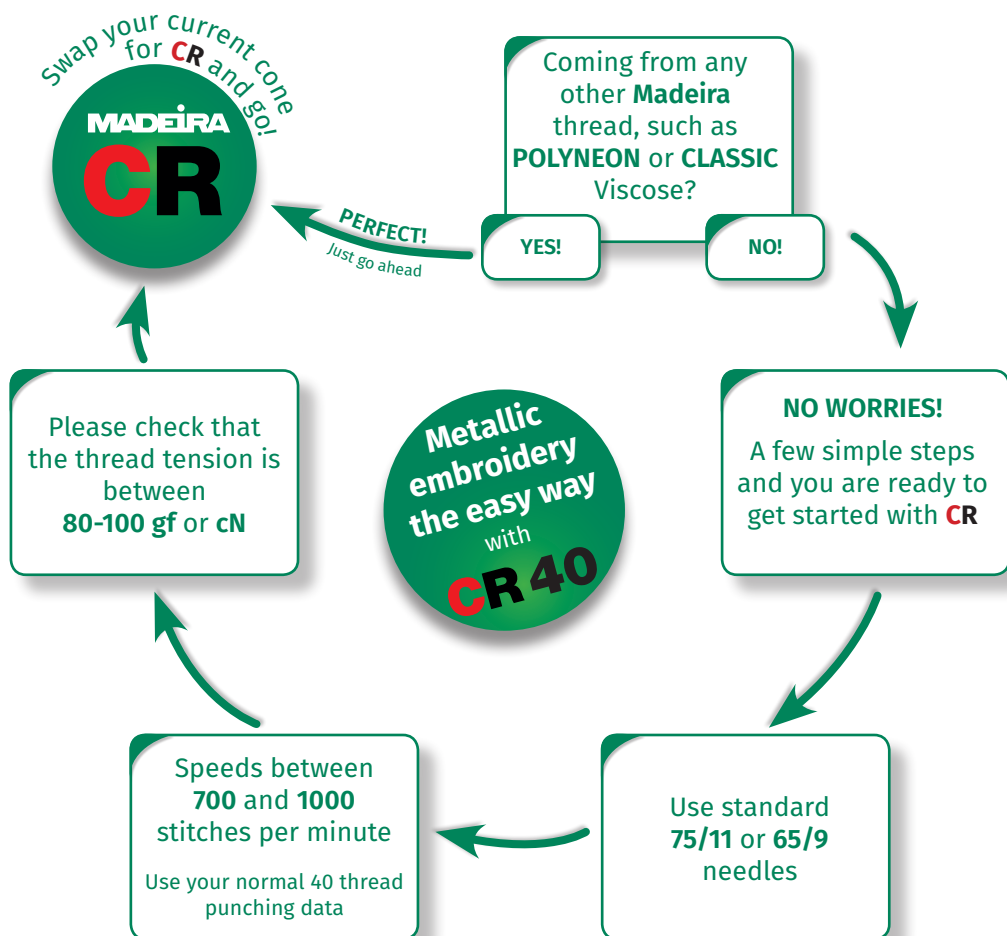

Having a heavier weight, **CR 20** works best with a higher upper thread tension and a lower maximum speed than the ones recommended for the **CR** standard size **40**. And, of course, it needs a different needle.
